

**BURCH****BURCH EGG ROOM COOLING UNITS**

Burch manufactures packaged cooling units which can be equipped with 2 stage room heating to control a desired temperature in egg holding rooms all year long.

A humidification system is also available to protect egg shells from losing moisture in the egg holding room. Hatching egg units are able to cool down as low as 55 degrees F while table eggs units cool as low as 40 degrees F.

Manufactured using tough, durable powder coated steel cabinets, these self contained, through the wall, units require little maintenance and are simply built to enable easy service in the field. Shipped fully charged, installation is very quick and conditioning of eggs can begin in a matter of minutes.
